Do you regularly use technology to complete your job?

 Copy

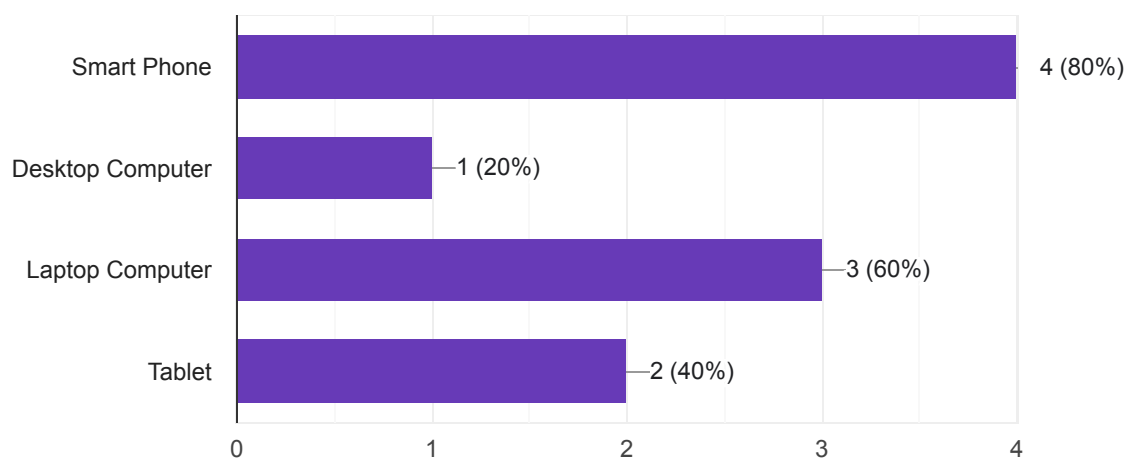

5 responses

What devices do you regularly use? This can be in your professional or personal life.

 Copy

5 responses

Is there anything that makes using technology more difficult for you? (colorblindness, limited mobility, etc)

4 responses

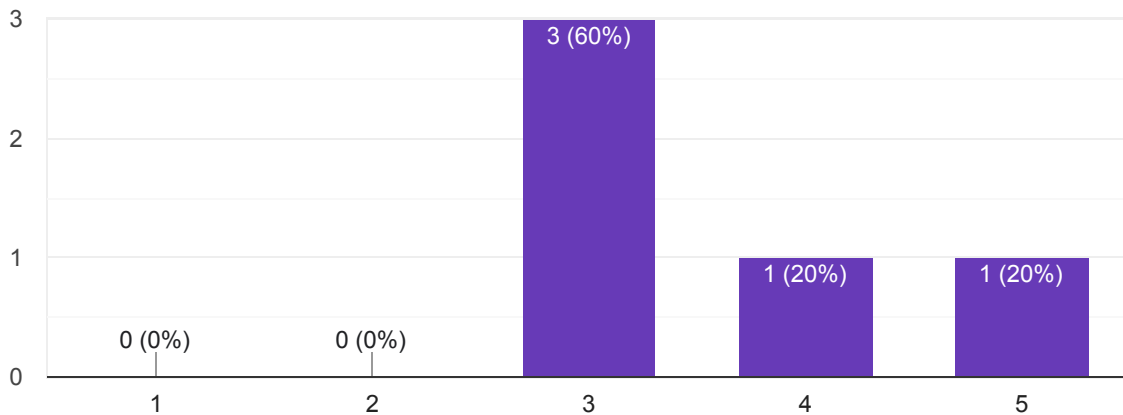

No

Not that I can think of.

How comfortable do you feel using unfamiliar technology?

 Copy

5 responses

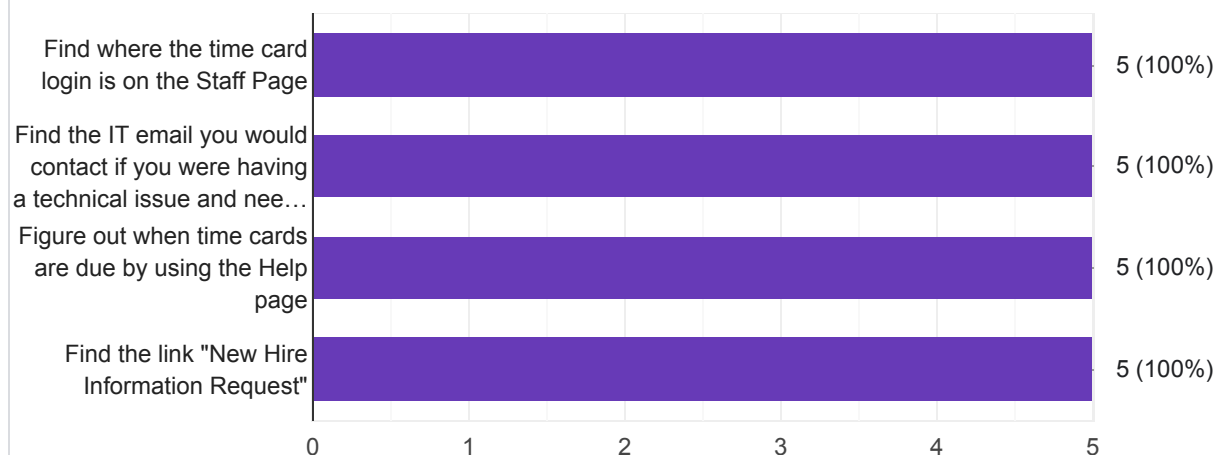

This is the testing portion of the survey. Please follow the link below and complete this list of task. You can check them off as you complete or don't complete them in the check boxes below. If you fail to complete a task, please do not check the box, it is not a big deal, we just want accurate results.

Here is your list of tasks. Please click the box of all tasks that you successfully complete. These tasks are not linked.

5 responses

These following tasks are all linked together and require the last step, again please check the boxes for what you complete and leave the ones that you do not complete blank.

5 responses

You have finished the test portion of this survey.

This is the Post Test section of the survey

If you failed to complete a task, please describe what issues you ran into below.

5 responses

I was able to complete all the tasks.

N/A

Not that I can think of.

NA

All tasks were completed.

Please describe anything that you felt was easy to complete.

5 responses

It was easy to create and post an announcement once I was logged in and it was easy to navigate between the pages of the website.

Most of the page was easy to follow

Everything was explained easy for me to understand, simple words helped with someone who has dyslexia.

It was easy to get to the help session.

All the tasks were easy to complete.

Please describe anything that you felt was difficult to complete.

5 responses

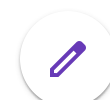

It was difficult to log in because the text was showing up as white and it was hard to identify the links as actual links because they're not the usual blue & underlined text that I am used to seeing as a link.

N/A

When trying to sign in, I wasn't able to see what I typing, so it was a little challenging making sure I was typing the correct email and password.

Without being able to see what I typed for my email and login, it was difficult in the sense that I had to make sure I typed out the login information perfectly.

-

What is your favorite feature of the website?

5 responses

I like the different, obvious boxes for the sections of a page.

The announcements page

Everything was on the front page.

I like that the Help, Staff Resources, and Important Links are all big boxes on the home page.

The feature that lets you post announcements.

What, if anything, would you change about this product?

5 responses

I would just change the log in information text box color.

Things that you click on make them a different color, make links look like links

Other than not seeing what I was typing in for the email, everything was straight forward. Anyone from the ages 6-80 would be able to get through the website/page.

I would make it so the big quick links to the other pages on the home page dont open that link in a new tab.

I like the product as it is so far.

Did you encounter anything unexpected during this test? Please describe if yes.

5 responses

No

nope.

Yes, not being able to see my email and password as I typed it in

Thank you for participating in our user testing!

Any extra feedback or questions.

1 response

Keeping the questions simple and not adding big fancy words made it clear for me to do.
