

Accessibility WriteUp :

Test 1:

ADA: NOT COMPLIANT

WCAG: NOT COMPLIANT

Issue: Screen reader and assistive technology issue as some buttons do not have name such as in the nav bar (`<button class="focus:outline-none">`).

Fix: Add a name by using aria-label

Issue: Visual and structural accessibility issues as the background and foreground do not have high enough contrast. The spots where this is an issue is `` , `<h2 class="text-3xl font-bold mb-4">`, `<p class="text-gray-600 mt-2">`.

Fix: Change dark colors to be darker and bolder and light colors to be lighter

Tests that passed:

1. Image elements do not have `[alt]` attributes that are redundant text.
2. Heading elements appear in a sequentially-descending order
3. List items (`- `) are contained within `
`, `
` or `` parent elements
- 4. Lists contain only `- ` elements and script supporting elements (`

16. Elements use only permitted ARIA attributes
17. `[role]`s have all required `[aria-*]` attributes
18. `[role]` values are valid
19. `[aria-*]` attributes have valid values
20. `[aria-*]` attributes are valid and not misspelled
21. Values assigned to `role=""` are valid ARIA roles.
22. Touch targets have sufficient size and spacing.
23. `[user-scalable="no"]` is not used in the `

Some Resources for Testing and Accessibility:

Accessibility: [Accessibility Checker - ADA & WCAG Compliance \(Free Scan\)](#)

Pro

- only requires url
- Free and simplistic
- Checks both ADA and WCAG

GSA Accessibility (Governmental) : [Federal website standards](#)

- Pro:Free, simplistic and uniform to all other gov websites
- Con: Must plan to evaluate your compliance with the three pending standards.

Accessibility To Do Before Testing:

-Alt text for images

Ex: HRDC logo

-add translate option to all text (a feature that exists on google already?)

-form intro labels

-the search bar needs one!

HCI Testing: This format can work both in person and remote
